

Rosa del Rosa Coste della Sesia rosato Doc 2010

The cold, snowy winter was followed by an unusually cool spring, late vegetative phase and some localised frost. The summer was also quite cool, but with a very good number of sunny days and the right amount of rain, and along with the natural thinning caused by the spring frosts led to an extraordinary and slow ripening of the grapes. The harvest was late, but in ideal conditions. The result is a vintage amongst the most classic in terms of the aromatic complexity, maturity and fineness of the tannins, and the right degree of freshness.

- Vineyards:** Grapes for this wine are grown in the Ormeggio, Castagnola and Belvedere vineyards in Lessona in the Orolungo region. They are also grown in the 45-90 year old Madonna degli Angeli vineyard in Brusnengo in the Forte region (it is included in the Bramaterra D.O.C).
- Soil:** In the Lessona vineyards, soils comprise marine sands from the pliocene period on igneous rock, mixed with more recent glacial sediment. The soil is acid (pH 4.5-5.5) rich in minerals and trace elements including iron, manganese, aluminium and zinc. Soils in the Madonna degli Angeli vineyard are composed of pebbles on a base of igneous rock which is close to the surface and veined with china clay. pH here is 5-6.
- Vines:** 85% Nebbiolo, 10% Vespolina, 5% Croatina.
- Rootstocks:** 3309-C, Gloire de Montpellier, 101-14, Gravesac, Rupestris du Lot.
- Plant density:** 5.000 vines per hectare.
- Altitude:** Lessona: 290-350 metres above sea level.
Madonna degli Angeli: 350-420 metres above sea level.
- Harvest:** From 26th September to 6th October 2010. The grapes are hand picked into small boxes.
- Vinification:** The grapes are sorted while on the conveyor belt, then destemmed and gently pressed then fed by gravity into the fermentation tank. Skin maceration lasts 12 hours. The wine then remained 4 months *sur lie*. Bottling: February 2011. Further ageing in bottle for some time before release.
